DATE MAILED: 01/04/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/496,009	Applicant(s) ELLIS ET AL.	
	Examiner William C. Vaughn, Jr.	Art Unit 2143	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4-6,8-16,18-28 and 30-46 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4-6,8-16,18-28 and 30-46 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

WCV

DETAILED ACTION

1. This Action is in regards to the Amendment and Reply received on 18 August 2004.

Response to Arguments

2. Applicant's arguments and amendments filed on 03 March 2004 have been carefully considered but they are not deemed fully persuasive. Applicant's arguments are deemed moot in view of the following new grounds of rejection as explained here below, necessitated by Applicant's substantial amendment (i.e., *receiving a first request from a client system ... first type...*) to the claims which significantly affected the scope thereof.
3. The application has been examined. **Claims 1, 2, 4-6, 8-16, 18-28 and 30-46** are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 1, 2, 4-6, 8-16, 18-28 and 30-46** are rejected under 35 U.S.C. 103(a) as being unpatentable over Rangachari et al. (Rangachari), U.S. Patent No. 6,470,227 in view of Tadokoro et al. (Tadokoro), U.S. Patent No. 6,463,352.
5. Regarding independent **claims 1, 15 and 27**, (e.g., exemplary independent claim 1), Rangachari discloses the invention substantially as claimed. Rangachari discloses *a tool management method comprising the steps of: receiving a first request from a client system via a*

Art Unit: 2143

network [see Rangachari, Col. 8, lines 43-46, Col. 9, lines 22-42, Col. 10, lines 45-51]

determining a type of said first request [see Rangachari, Col. 10, lines 52-64]; *and sending a first message to a tool in response to said first request and said first type, wherein said first message is operable for controlling an action of said tool* [see Rangachari, Col. 6, lines 26-51, Col. 7, lines 20-24 and Col. 8, lines 17-20]. However, Rangachari does not explicitly disclose using a first predetermined field in a portion of said first request.

6. In the same field of endeavor, Tadokoro discloses (e.g., a system for controlling software components for machines in a distributed manner). Tadokoro discloses using a first predetermined field in a portion of said first request (Tadokoro teaches utilizing IP address, port at an IP address), [see Tadokoro, Co. 10, lines 1-25].

7. Accordingly, it would have been obvious to one of ordinary skill in the networking art at the time the invention was made to have incorporated Tadokoro's teachings of a system for controlling software components for machines in a distributed manner with the teachings of Rangachari, for the purpose of improving workflow efficiency of a system by better monitoring processes, thereby preventing bottlenecks [see Tadokoro, Col. 2, lines 10-25]. By this rationale **claims 1, 15, and 27** are rejected.

8. Regarding **claims 2, 16 and 28**, Rangachari-Tadokoro discloses *further comprising the step of determining an identification of a tool object corresponding to said tool using a second predetermined field in said portion of said request* [see rejection of claim 1, supra]. By this rationale **claims 2, 16 and 28** are rejected.

9. Regarding **claims 4, 18 and 30**, Rangachari-Tadokoro discloses *wherein said tools return at least one second message associated with said first action, said method further comprising the*

Art Unit: 2143

step of caching said at least one second message [see Rangachari, Col. 13, lines 50-64 and Tadokoro, Col. 13, lines 12-28]. By this rationale **claims 4, 18 and 30** are rejected.

10. Regarding **claim 5, 19 and 31**, Rangachari-Tadokoro discloses *further comprising the steps of: retrieving selected ones of said at least one second message; and generating a response to a second request using said selected ones of said at least one second message* (Rangachari teaches that methods are invoked between application objects and servers to perform specific tasks outlined within a message), [see Rangachari, Col. 10, lines 52-64, Figure 1]. By this rationale **claims 5, 19 and 31** are rejected.

11. Regarding **claims 6, 20 and 32**, Rangachari-Tadokoro discloses *further comprising the step of sending said response to a client system initiating said first and second requests* (Rangachari teaches that the client is notified of the completion of a task along with any attributes that are need), [see Rangachari, Col. 10, lines 64-67, Col. 11, lines 1-3]. By this rationale **claims 6, 20 and 32** are rejected.

12. Regarding **claims 8, 21 and 33**, Rangachari-Tadokoro discloses *further comprises the steps of receiving a connection request and opening a connection to a client, said connection being operable for communicating requests and responses to said requests* (Tadokoro teaches HTTP requests), [see Tadokoro, Col. 12, lines 43-45]. By this rationale **claims 8, 21 and 33** are rejected.

13. Regarding **claims 9, 22 and 34**, Rangachari-Tadokoro discloses *further comprising the steps of: receiving a second request from said client system via said network* [see rejection of claim 1, supra], *said second request selected from the group consisting of information requests, expand requests and edit requests* [see Tadokoro, Figures 10-14], *wherein, in response to said*

information requests, an HTML page is generated using a set of selected data for a tool object corresponding to a managed tool for sending to said client system, as well as in response to said edit requests, an HTML page is generated having a portion operable for user entry of one or more values for modifying a tool object attribute for sending to said client system and in response to said expand request an HTML page is generated using a set of child object names and relations to a parent object identified in said expand request for sending to said client [see Tadokoro, Col. 8, lines 10-37, Col. 9, lines 1-9, Col. 12, lines 21-44]. By this rationale **claims 9, 22 and 34** are rejected.

14. Regarding **claims 10, 23 and 35**, Rangachari-Tadokoro discloses *wherein said first type of said first request denotes an execute request* [see Rangachari, Col. 10, lines 52-64]. By this rationale **claims 10, 23 and 35** are rejected.

15. Regarding **claims 11-13, 24-26 and 36-38**, the limitations of these claims are substantially the same as that of claims 1, 15, 27, and 35 above, and thus are rejected for the same rationale in rejecting those claims. Furthermore, with regards to the limitations of parsing a script: determining if said script source includes a method signature matching a method signature of said tool object method; and if so, executing a corresponding portion of said script [see Tadokoro, col. 12, lines 21-44]. By this rationale claims 11-13, 24-26 and 36-38 are rejected.

16. Regarding **claims 14, 45, and 46**, Rangachari-Tadokoro discloses *wherein said first request is transferred in accordance with the hypertext transfer protocol (HTTP), and said portion corresponds to a uniform resource locator (URL)* [see Tadokoro, Col. 10, lines 1-47]. By this rationale **claims 14, 45, and 46** are rejected.

Art Unit: 2143

17. Regarding **claims 39-44** the limitations of this claim are substantially the same as that of claims 9, 22, and 34 and thus is rejected for the same rationale in rejecting claim 9 above. By this rationale **claims 39-44** are rejected.

Conclusion

18. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Vaughn, Jr. whose telephone number is (571) 272-3922. The examiner can normally be reached on 8:00-6:00, 1st and 2nd Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Wiley can be reached on (571) 272-3923. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
